

Nitesh Chachriya

29 April 2025

Assessment

Influence Quotient: 70/100

Qualitative Analysis - Positive

- You delivered the presentation with a clear and concise introduction, effectively highlighting your educational background and interests in AI, ML, and Data Science.
- You demonstrated a strong foundation in Mathematics, particularly in Probability Theory and Graph Theory, which are crucial for Machine Learning and Deep Learning.
- You showcased a range of practical projects, including computer vision, natural language processing, and machine learning, which demonstrates your skills in algorithm development and problem-solving.
- You expressed enthusiasm and eagerness to contribute to the field of AI, ML, and Data Science, which is a positive indicator of your motivation and dedication.

Qualitative Analysis - Areas of Improvement

- You could improve by providing more specific examples of how your projects were implemented and the results you achieved, to give a clearer picture of your skills and accomplishments.
- You mentioned receiving several awards, but it would be more effective to explain the significance of these awards and how they relate to your skills and qualifications.
- You could benefit from elaborating on your MSc project, 'Random Simplified Complexes', to help the listener understand the context and significance of the project.
- You may want to consider avoiding phrases such as 'just learning theory wasn't enough', as it comes across as slightly dismissive of theoretical knowledge, which is an important foundation for AI, ML, and Data Science.
- You could improve the conclusion by summarizing your key strengths and reiterating your interest in the position, rather than simply stating that you are 'excited about the chance to share your expertise'.
- Facial expressions were moderate. While present at times, increasing expressiveness could make the talk more dynamic.

- The speaker rarely used any gestures. Incorporating some body language could significantly boost engagement.

Detailed Evaluation Metrics

No.	Individual Parameters	5 Point scale:	Feedback: Excellent(5), Good(4) Satisfactory(3), Needs Improvement(2), Poor(1)
1.	Level of Confidence through the presentation • Posture • Smile • Eye Contact • Energy levels through the presentation	4	Posture: 3 Smile: 2 Eye Contact: 2 Energy levels through the presentation: 3
2.	Did the speaker vary their tone, speed, volume?	3	You maintained a good tone. You could have maintained a steady speed in delivery. A few words were pronounced very fast. Your volume was appropriate.
3.	Did they use any gesture with thier hands or body while speaking?	1	The speaker rarely used any gestures. Incorporating some body language could significantly boost engagement.
4.	Did they have expression on their face?	3	Facial expressions were moderate. While present at times, increasing expressiveness could make the talk more dynamic.
5.	Who are you and what are your skills, expertise, personality traits?	5	You are a student with skills in AI and Data Science. You have expertise in Mathematics and Programming. You have a strong personality with a desire for excellence.

6.	Why are you the best person to fit this role?	5	You are the best person to fit this role because you have a strong academic background. You performed well in your projects and studies. You have a good mix of theoretical knowledge and practical skills. You have experience in working on various projects. You have a strong desire to learn and grow. You have received several awards and fellowships during your academic journey.
7.	How are you different from others?	4	You are different from others because you have a unique combination of skills. You have a strong foundation in Mathematics. You have experience in working on practical projects. You have a strong desire to innovate and make meaningful contributions. You have a good understanding of the field.
8.	What value do you bring to the role?	4	You bring value to the role because you have a strong academic background. You have a good mix of theoretical knowledge and practical skills. You have experience in working on various projects. You have a strong desire to learn and grow. You have a good understanding of the field.
9.	Did the speech have a structure of Opening, Body and Conclusion?	3	Your speech had a structure of opening, body, and conclusion, but it could be improved.
10.	How was the quality of research for the topic? Did the student's speech demonstrate a good depth? Did they cite the sources of research properly?	3	You demonstrated a good depth of knowledge in the topic. You could have cited more sources of research. You did not provide enough evidence to support your claims. You performed well in explaining your projects and studies. You could have provided more details about your research. You have a good understanding of the field, but you could have explored more topics.

11.	How creatively did the student present the video?	3	You presented the video in a simple and straightforward way. You could have used more visuals and graphics to make it more engaging. You performed well in explaining your thoughts and ideas. You could have used more creative ways to present your projects and studies. You did not use any props or animations.
12.	How convinced were you with the overall speech on the topic? Was it persuasive? Will you give them the job/opportunity?	4	You were somewhat convincing in your speech. You were persuasive in explaining your skills and experience. You could have been more persuasive in explaining why you are the best fit for the role. You performed well in highlighting your strengths and achievements. You could have provided more examples to support your claims. You have a good chance of getting the job, but you could have done better in presenting yourself.
