

new Candidate

29 April 2025

Assessment

Influence Quotient: 73/100

Qualitative Analysis - Positive

- You effectively introduced yourself and clearly stated the purpose of the video resume, making it easy to understand your background and qualifications.
- You demonstrated a strong foundation in neuroscience and AI, showcasing your unique blend of skills and knowledge.
- You highlighted your research experience and accomplishments, such as building reinforcement learning algorithms and deep neural network models, which showcases your technical skills.
- You confidently expressed your enthusiasm for the PhD position at the Neuro AI Lab and emphasized your ability to thrive in a collaborative environment.

Qualitative Analysis - Areas of Improvement

- You could improve by providing more specific examples of how you applied computational neuroscience techniques to study the brain, rather than just stating that you are skilled in this area.
- You mentioned that you are proficient in developing and training AI algorithms, but it would be helpful to explain your process and the tools you use in more detail.
- You stated that your first author research was selected for the Women in ML workshop, but it would be beneficial to elaborate on the research and its significance.
- You could benefit from rephrasing the sentence 'Just be sure that your decision will be met with no regrets' as it comes across as somewhat presumptuous and may not be well-received by the reviewer.
- You should avoid making statements that may be perceived as overly confident or arrogant, such as 'I am the perfect blend of a strong foundation in neuroscience coupled with exceptional AI proficiency' and instead focus on showcasing your skills and qualifications in a more humble and professional manner.
- Facial expressions were moderate. While present at times, increasing expressiveness could make the talk more dynamic.

- The speaker used excessive hand and body gestures. Reducing the intensity slightly could help avoid distraction and improve clarity.

Detailed Evaluation Metrics

No.	Individual Parameters	5 Point scale:	Feedback: Excellent(5), Good(4) Satisfactory(3), Needs Improvement(2), Poor(1)
1.	Level of Confidence through the presentation • Posture • Smile • Eye Contact • Energy levels through the presentation	4	Posture: 3 Smile: 2 Eye Contact: 2 Energy levels through the presentation: 3
2.	Did the speaker vary their tone, speed, volume?	3	You maintained a good tone. You could have maintained a steady speed in delivery. A few words were pronounced very fast. Your volume was appropriate.
3.	Did they use any gesture with thier hands or body while speaking?	5	The speaker used excessive hand and body gestures. Reducing the intensity slightly could help avoid distraction and improve clarity.
4.	Did they have expression on their face?	3	Facial expressions were moderate. While present at times, increasing expressiveness could make the talk more dynamic.
5.	Who are you and what are your skills, expertise, personality traits?	5	You are a skilled individual with expertise in neuroscience and AI. You have a strong foundation in biology. You are a quick learner. You thrive in collaborative environments.

6.	Why are you the best person to fit this role?	4	You performed well in highlighting your research experience. You built reinforcement learning algorithms to model motor learning in the brain. You developed deep neural network models to solve complex decision-making problems. You did well in showcasing your skills in applying computational neuroscience techniques. You were proficient in developing and training AI algorithms. You had a good understanding of theoretical concepts. You could have elaborated more on your coursework and intense assignments. You could have provided more details about your research at the neuroscience lab. You had a good opportunity to talk about your experience at the Women in ML workshop.
7.	How are you different from others?	5	You are different from others because you have a unique combination of neuroscience knowledge and technical skills. You have a strong foundation in biology. You are proficient in AI. You have a good understanding of behavioral analysis techniques. You are well-versed in psychophysical methods. You have a strong research background. You have presented your research at a leading conference.
8.	What value do you bring to the role?	5	You bring value to the role because you are a quick learner. You thrive in collaborative environments. You have a strong foundation in neuroscience and AI. You have a good understanding of computational neuroscience techniques. You are proficient in developing and training AI algorithms. You have a unique combination of skills and knowledge. You have a strong research background.
9.	Did the speech have a structure of Opening, Body and Conclusion?	3	Your speech had a structure of opening, body, and conclusion.

10.	How was the quality of research for the topic? Did the student's speech demonstrate a good depth? Did they cite the sources of research properly?	4	You demonstrated a good depth of knowledge in neuroscience and AI. You cited your research experience and presentations. You talked about your coursework and intense assignments. You could have provided more details about your research at the neuroscience lab. You could have elaborated more on your experience at the Women in ML workshop. You did not provide any external sources of research.
11.	How creatively did the student present the video?	3	You presented the video in a straightforward manner. You could have been more creative in presenting your research experience. You could have used visuals to showcase your projects. You did well in highlighting your skills and knowledge. You had a clear and concise message.
12.	How convinced were you with the overall speech on the topic? Was it persuasive? Will you give them the job/opportunity?	4	You were convincing in your speech. You were persuasive in highlighting your research experience and skills. You had a strong confidence in your tone. You did well in showcasing your unique combination of skills and knowledge. You had a good opportunity to talk about your experience at the Women in ML workshop. You could have elaborated more on your coursework and intense assignments.
