

Nitesh Chachriya

29 April 2025

Assessment

Influence Quotient: 77/100

Qualitative Analysis - Positive

- You have effectively introduced yourself and clearly stated your interests in AI, ML, and Data Science studies.
- You have provided a concise overview of your educational background, highlighting your relevant coursework and projects.
- You have demonstrated a good understanding of the technical concepts, such as Probability Theory, Graph Theory, and Machine Learning, and have explained them in a straightforward manner.
- You have showcased your enthusiasm and eagerness to contribute to the field and work with the team, which is a positive aspect of your presentation.

Qualitative Analysis - Areas of Improvement

- You could improve by providing more specific examples of how you applied theoretical knowledge to practical projects, rather than just listing the projects you worked on.
- You may want to consider quantifying your achievements, such as the accuracy of your convolutional neural network, to demonstrate the impact of your work.
- You could benefit from breaking up long sentences into shorter, more manageable ones, to improve the flow and clarity of your content.
- You may want to avoid using phrases such as 'yet just learning theory wasn't enough', as it comes across as slightly informal, and instead opt for more formal language.
- You could improve by highlighting your unique strengths and what sets you apart from other candidates, rather than just stating your general interest in the field.
- Facial expressions were moderate. While present at times, increasing expressiveness could make the talk more dynamic.
- The speaker rarely used any gestures. Incorporating some body language could significantly boost engagement.

Detailed Evaluation Metrics

No.	Individual Parameters	5 Point scale:	Feedback: Excellent(5), Good(4) Satisfactory(3), Needs Improvement(2), Poor(1)
1.	Level of Confidence through the presentation • Posture • Smile • Eye Contact • Energy levels through the presentation	4	Posture: 3 Smile: 2 Eye Contact: 2 Energy levels through the presentation: 3
2.	Did the speaker vary their tone, speed, volume?	3	You maintained a good tone. You could have maintained a steady speed in delivery. A few words were pronounced very fast. You had a varying volume. You spoke clearly most of the time.
3.	Did they use any gesture with thier hands or body while speaking?	1	The speaker rarely used any gestures. Incorporating some body language could significantly boost engagement.
4.	Did they have expression on their face?	3	Facial expressions were moderate. While present at times, increasing expressiveness could make the talk more dynamic.
5.	Who are you and what are your skills, expertise, personality traits?	5	You are a skilled individual with expertise in AI and Data Science. You have a strong educational background. You have a good personality trait of being eager to learn.
6.	Why are you the best person to fit this role?	5	You are the best person to fit this role because you have a strong theoretical knowledge. You performed well in your academic journey. You have a good mix of practical skills. You performed well in your projects. You have a strong desire to excel. You have received several awards during your academic journey.

7.	How are you different from others?	5	You are different from others because you have a unique blend of theoretical and practical knowledge. You have a strong educational background. You have a good personality trait of being eager to learn. You have worked on various practical projects.
8.	What value do you bring to the role?	5	You bring value to the role because you have a strong knowledge of AI and Data Science. You have a good mix of practical skills. You have a strong desire to excel. You have received several awards during your academic journey.
9.	Did the speech have a structure of Opening, Body and Conclusion?	4	Your speech had a good structure of opening, body, and conclusion, but it could be improved with more transitions between sections.
10.	How was the quality of research for the topic? Did the student's speech demonstrate a good depth? Did they cite the sources of research properly?	4	You demonstrated a good depth of knowledge in your speech. You cited some sources of research properly, but it was not explicit. You could have provided more examples to demonstrate your research skills.
11.	How creatively did the student present the video?	3	You presented the video in a straightforward manner. You could have been more creative in your presentation. You used some technical terms, but you explained them well.
12.	How convinced were you with the overall speech on the topic? Was it persuasive? Will you give them the job/opportunity?	4	You were convincing in your speech, but there were some areas for improvement. You were persuasive in your conclusion. You have a good chance of getting the job, but it depends on the other candidates.
